k. Description of Application: Alabama Power Company seeks approval to replace the Unit 4 turbine at the Jordan Dam Project. Specifically, the licensee proposes the following work: complete turbine replacement, wicket gate system rehabilitation or replacement, gate stem bushing replacement, turbine and generator bearing refurbishment, and related component replacement. The turbine unit modifications are expected to increase the turbine rating by approximately 3 megawatts (MW), as well as increase efficiency and annual generation; however, since the unit is generator-limited, the installed capacity will not change. The unit replacement would result in a maximum hydraulic capacity increase of approximately 4.6 percent for Unit 4, and 1.2 percent for the Project. No change in project operations is proposed.
